DURASTRUT™ ASSEMBLIES

DURA STRUT™

DuraStrut™ Complete Strut Assemblies make replacing worn out struts a breeze. Our Complete Strut Assemblies are produced from the finest materials, surfaces are machined to the narrowest tolerances and quality control is incorporated in all production processes.

DuraStrut quality is supported with validation testing performed by an independent accredited US laboratory. The laboratory performed a 1,000,000 cycle severe vibration test simulating real road conditions. After the demanding 1,000,000 cycles were complete the components and compression of the DuraStrut were still within the original specifications! The DuraStrut offers you the best of all worlds'... superior quality at an affordable price.

DuraStrut ANATOMY

Teflon® / graphite composite piston seal provides strength and extended strut life and durability.

Seamless pressure tube micro finished to a Ra.04 surface for maximum strength and longevity.

Strut Rod manufactured from High Quality Carbon Steel with a Chrome Hardened Finish into a "Net Pattern" meeting a minimum "Ra.04" surface finish for long lasting performance.

Double lip seal with integral wiper keeps oil and gas charge in and contaminants out. Teflon® / copper top bushing provides superior resistance to wear.

Environmentally friendly: lead free electrostatically applied and post-cured automotive grade paint.

COMPLETE STRUT ASSEMBLIES READY TO INSTALL

FEATURES

- Loaded Strut assembly ready to install
- New strut, coil and top plate (including bearing where applicable)
- Preassembled for easy installation
- Engineered to restore ride, safety and performance
- Simple bolt on design

New Strut Top Plate and Bearing manufactured using 3D machining technology for precise alignment.

Powder Coated Coil Spring resists rust. Wire diameter, coil count and spacing offer improved ride and chassis stability.

Nitrile synthetic rubber bellows & boots are fixed to protect strut rod and seals from dirt and debris.

What you can't see is sometimes more important than what you can. DuraStruts feature premium European engineered strut oil for constant long lasting performance.

Brackets and hangers designed for quick installation without relocating cables or brake line.

Pressure retaining welds are applied using advanced "submerged" robotic welding technology, minimizing the chance for impurities to corrupt the weld.

MANUFACTURING

Dura International® has a rich history in manufacturing, importation and distribution of aftermarket automotive products. The company began over 40 years ago as an importer, primarily supplying the air-cooled Volkswagen market. Through the years we have developed a diverse product offering. Our complete strut assembly program is the professional's choice for quality, cataloging, profitability and first to market applications.

We take pride in our attention to detail and our reputation for outstanding quality. DuraStruts™ go through a rigid quality control process that involves multiple tests during the

manufacturing process and ongoing QC testing for rod surface finish, chrome "net-pattern", tube bore, compression and rebound. This dedication to high production standards results in complete strut assemblies with the quality, safety and reliability your customers demand. Dura International has an impressive reputation in the automotive industry for its commitment to quality and service at affordable prices.

Dura International's excellent products, combined with a lean business model and multiple distribution centers, ensures expedient delivery and an enhanced bottom line.

ELECTRONIC CATALOGING

Dura International has one of the most accurate and up-to-date complete strut assembly catalogs in the automotive aftermarket. Dura International has made a significant investment into an electronic cataloging system and licensed an OEM vehicle database. We employ an in-house professional cataloging staff to support our aftermarket programs. Every Dura International part number is cataloged with photos detailing the side, bottom and top of the DuraStrut to visually ensure the proper application.

Our catalogs are updated with the industry electronic catalog leaders (Activant® and WHI Solutions®) on a regular basis.

Dura International can help your customers find the exact part they're looking for with Dura International online-cataloging. This comprehensive cataloging system offers accurate and up-to-date product application information that can be easily accessed over the internet at www.duraintl.com.

DISTRIBUTION

Distribution is a vital component of our satisfied customer base and over-all success. We have three distribution centers located in California, Tennessee, and New Jersey.

Our national distribution system gives us a distinct advantage, which enables us to consistently expedite prompt, cost-effective deliveries.

Dura International offers award-winning customer support with a personal touch. The dedication put into customer service allows Dura International to offer you same day order confirmation, prompt order turn around, and a consistently high rate of order fulfillment. If you have a question or concern, contact us at 800-388-4442 or 24/7 online at www.duraintl.com. We know what it's like running a business; therefore we strive to take the hassle out of running yours by making sure you get the parts you need when you need them.
